

试题名称：有机化学

一、完成反应

二、选择题

1. a, d 非手性; b, 手性 (S,S), c, 手性 (R,R)
b 与 c 是对映体; b, c 与 a 或 d 是非对映异构关系
2. $a > b > d > c$
3. a 是主要产物, 因为 S 的亲核性大于 N
 CHCl_3 为溶剂比 CH_3OH 反应快, 过渡态的电荷比试剂分散, 极性小的溶剂对反应有利

5. $b > a > e > c > d$
6. 正确配对的是 a 和 d
7. a 不变旋
8. c
